## GRID SOFTWARE LICENSING MODEL

### [1.4 CHOOSING THE RIGHT LICENSE](#)

### [1.5 NVIDIA LICENSE MANAGER](#)

## TERMINOLOGY

| Term                         | Meaning  |
|------------------------------|--|
| <b>SUMs</b>                  | Support, Upgrade and Maintenance program   |
| <b>Perpetual License</b>     | A non-expiring, permanent software license that can be used on a perpetual basis without a need to renew. First year of SUMS is required.  |
| <b>Annual Subscription</b>   | A software license that is active for a fixed period as defined by the terms of the subscription license, typically yearly. This includes SUMS for the duration of the license term.                     |
| <b>License Manager</b>       | An application that manages license allocation, installed on a physical or virtual server.   |
| <b>Concurrent User (CCU)</b> | A method of counting licenses based on active user VMs. If the VM is active and the NVIDIA GRID software is running, then this counts as one CCU. A GRID CCU is independent of the connection to the VM. |

# OVERVIEW

The NVIDIA GRID® software delivers accelerated virtual desktops and applications from the data center to any user, on any device, anywhere.

This guide covers the entitlement, packaging and licensing of the GRID family of products. It is intended to be a quick reference to understand the product portfolio at a high level, with the corresponding SKU information. It does not contain detailed product information, which can be accessed from the GRID website at <http://www.nvidia.com/grid>. This document is not intended to replace or contradict the End User License Agreement (EULA). Please refer to the EULA ([here](#)) for more detailed information.

| GRID Software Editions                  |   |
|---|---|
| <b>NVIDIA GRID Virtual Applications</b> | For organizations deploying XenApp or other RDSH solution. Designed for PC level applications and server based desktops.                      |
| <b>NVIDIA GRID Virtual PC</b>           | For users who want a virtual desktop but need great user experience leveraging PC Windows® applications, browsers, and high definition video. |
| <b>NVIDIA GRID Virtual Workstation</b>  | For users who want to be able to use remote professional graphics applications with full performance on any device, anywhere.                 |

NVIDIA GRID brings graphics and virtualization capabilities to NVIDIA Tesla data-center deployments, and is currently supported on the following Tesla GPUs. Find certified servers with Tesla GPUs that are supported by GRID at <http://www.nvidia.com/grid-certified-servers>.

| GRID Supported GPU              | Tesla M10                  | Tesla M60                  | Tesla M6             |
|---------------------------------|----------------------------|----------------------------|----------------------|
| <b>Use case</b>                 | User Density-Optimized     | Performance-Optimized      | Blade-Optimized      |
| <b>Number of GPUs</b>           | 4 NVIDIA Maxwell GPUs      | 2 NVIDIA Maxwell GPUs      | 1 NVIDIA Maxwell GPU |
| <b>Total NVIDIA CUDA® Cores</b> | 2,560 (640 per GPU)        | 4,096 (2,048 per GPU)      | 1,536                |
| <b>Total Memory Size</b>        | 32 GB GDDR5 (8 GB per GPU) | 16 GB GDDR5 (8 GB per GPU) | 8 GB GDDR5           |
| <b>Max Power</b>                | 225 W                      | 300 W                      | 100 W                |
| <b>Form Factor</b>              | PCIe 3.0 Dual Slot         | PCIe 3.0 Dual Slot         | MXM                  |
| <b>Board Dimensions</b>         | 10.5" x 4.4"               | 10.5" x 4.4"               | 3.2" x 4.1"          |
| <b>Cooling Solution</b>         | Passive                    | Passive / Active           | Bare Board           |

# GENERAL PURCHASING INFORMATION

NVIDIA GRID software products can be purchased through NVIDIA Preferred Partners and select server OEMs. A list of these Preferred Partners and OEMs can be obtained from: <http://www.nvidia.com/buygrid>.

All three NVIDIA GRID software products can be purchased as either perpetual licenses with yearly Support Updates and Maintenance agreement (SUMS), or as an annual subscription. The perpetual license gives the user the right to use the software indefinitely, with no expiration. All NVIDIA GRID software products with perpetual licenses must be purchased in conjunction with a minimum of one year of SUMS. This subscription can be renewed on a yearly basis.

The annual subscription offering is a more affordable option to allow IT departments to better manage the flexibility of license volumes. NVIDIA GRID software products with annual subscription are bundled with SUMS for the duration of the software’s subscription license.

| Entitlement                  | NVIDIA GRID Production SUMS   |
|------------------------------|---|
| Maintenance                  | Access to all maintenance releases, defect resolutions, and security patches for flexibility in upgrading for up to 3 years |
| Upgrades                     | Access to all new major version releases including feature enhancements and new hardware support                            |
| Long-Term branch maintenance | Available for up to 3 years from general availability   |
| Direct support               | Direct access to NVIDIA support engineering for timely resolution of customer-specific issues                               |
| Support availability         | 24 x 7  |
| Knowledgebase access         | ✓   |
| Web support                  | ✓   |
| E-mail support               | ✓   |
| Phone support                | ✓   |

# GRID PRODUCT DETAILS

NVIDIA GRID is the industry's most advanced technology for sharing true virtual GPU (vGPU) hardware acceleration between multiple users—without compromising the

graphics experience. This virtualization technology ensures complete application compatibility which means features and experience are the same as they would be on a physical device.

## 1.1 GRID SOFTWARE EDITIONS

NVIDIA GRID desktop and application virtualization solutions are designed to bring the power of virtualization to the users who need to be their most productive. GRID technology ensures application compatibility, meaning any application that can run in a physical desktop can run in a virtual environment. Organizations can now expand their virtualization footprint without compromise.

NVIDIA GRID is available in three editions: GRID Virtual PC (vPC), GRID Virtual Workstation (vWS), and GRID Virtual Application (vApp).

### GRID Virtual PC

This product is ideal for users who want a virtual desktop but need great user experience leveraging PC Windows® applications, browsers and high definition video. NVIDIA GRID Virtual PC delivers a native experience to users in a virtual environment, allowing them to run all of their PC applications at full performance.

### GRID Virtual Workstation

This edition is ideal for mainstream and high-end designers who use powerful 3D content creation applications like Dassault CATIA, SOLIDWORKS, and 3DExcite, Siemens NX, PTC Creo, Schlumberger Petrel, or Autodesk Maya. NVIDIA GRID Virtual Workstation allows users to access their professional graphics applications with full features and performance, anywhere, on any device.

### GRID Virtual Applications

For organizations deploying XenApp or other RDSH solutions. Designed to deliver PC Windows® applications at full performance. NVIDIA GRID Virtual Applications allows users to access any Windows® application at full performance on any device, anywhere.

This edition is suited for users who would like to virtualize applications using XenApp or other RDSH solutions. Windows® Server hosted RDSH desktops are also supported by vApps.

## 1.2 GRID SOFTWARE EDITIONS AND ENTITLEMENT

NVIDIA GRID software is licensed per concurrent user. Each product includes the following feature entitlement:

| Feature                                 | GRID Virtual Apps | GRID Virtual PC | GRID Virtual Workstation |
|---|-------------------|-----------------|--------------------------|
| <b>License Entitlement</b>              |                   |                 |                          |
| Concurrent User (CCU)                   | Yes               | Yes             | Yes                      |
| <b>Capability Entitlement</b>           |                   |                 |                          |
| Desktop Virtualization                  |                   | Yes             | Yes                      |
| RDSH App Hosting                        | Yes               | Yes             | Yes                      |
| Windows Guest OS                        | N/A               | Yes             | Yes                      |
| Linux Guest OS                          | N/A               |                 | Yes                      |
| Maximum Displays                        | N/A               | 4               | 4                        |
| Maximum Resolution                      | N/A               | 2560*1600       | 4096*2160 (4K)           |
| <b>NVIDIA Quadro Software Feature</b>   |                   |                 | Yes                      |
| CUDA & OpenCL Supported <sup>1</sup>    | Yes               |                 | Yes                      |
| GPU Pass-through Supported <sup>1</sup> | Yes               |                 | Yes                      |
| BareMetal Supported <sup>2</sup>        | Yes               |                 | Yes                      |
| <b>vGPU Profiles Supported</b>          |                   |                 |                          |
| 512 MB                                  |                   | Yes             |                          |
| 1 GB                                    | Yes               | Yes             | Yes                      |
| 2 GB                                    | Yes               |                 | Yes                      |
| 4GB                                     | Yes               |                 | Yes                      |
| 8 GB                                    | Yes               |                 | Yes                      |

<sup>1</sup> Supported only on 8GB 1:1 profiles

<sup>2</sup> Only NVIDIA Tesla M6 Hardware supported as primary display device

## GRID SOFTWARE LICENSING AND PRICING

GRID Virtual PC, Virtual Workstation and Virtual Applications are available on a per Concurrent User (CCU) model. A CCU license is required for every user who is

accessing or using the software at any given time, whether or not an active connection to the virtualized desktop or session is maintained.

NVIDIA GRID editions can be purchased as either perpetual licenses with annual Support Updates and Maintenance Subscription (SUMS), or as an annual subscription. The first year of SUMS is required with purchase of a perpetual license and can then be purchased as a yearly subscription. For annual licenses SUMS is bundled into the annual license cost.

GRID Software Pricing is listed in the tables below, [find the full SKU list here](#). Pricing is suggested pricing only, contact your authorized NVIDIA partner for final pricing.

### 1.1 SUBSCRIPTION CONCURRENT USER LICENSE

An annual subscription is active for a fixed period as defined by the terms of the subscription license. To be kept active, the license will need to be renewed at the end of the subscription period. The subscription license includes the software license and production level SUMS for the duration of the license subscription period.

| Annual Subscription Pricing |                            |
|-----------------------------|----------------------------|
| Virtual Applications        | \$10 per CCU subscription  |
| Virtual PC                  | \$50 per CCU subscription  |
| Virtual Workstation         | \$250 per CCU subscription |

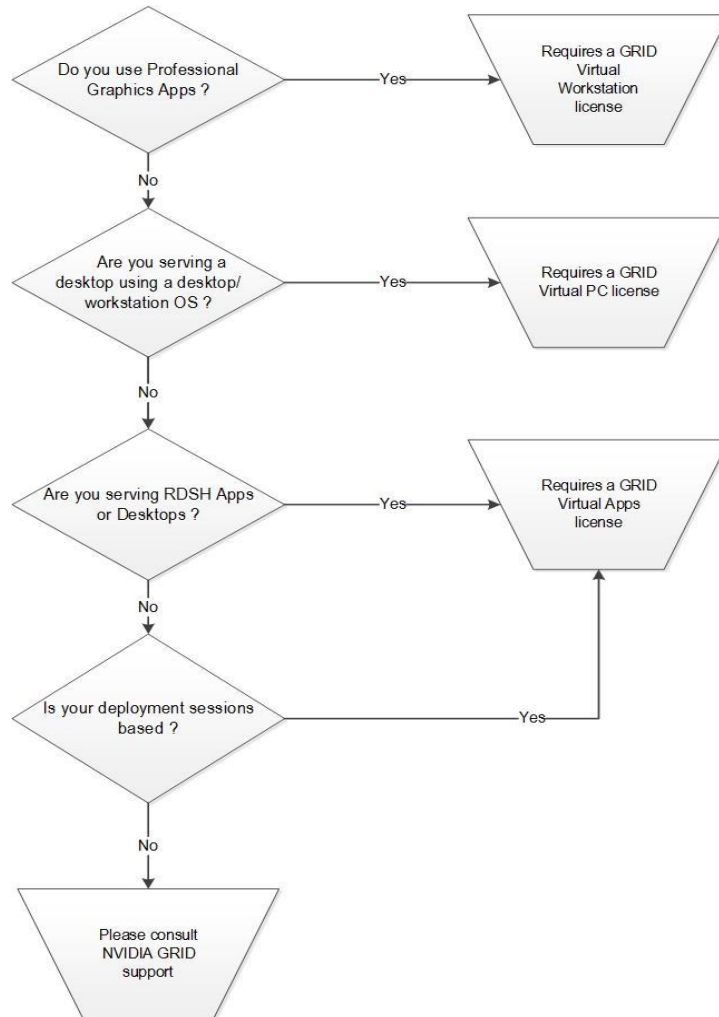

### 1.2 PERPETUAL CONCURRENT USER LICENSE

A perpetual license allows for use of the licensed software indefinitely. Users that opt to license using this model are required to subscribe to SUMS for the first year. The SUMS subscription can be renewed on a yearly basis after the expiring of the initial subscription.

| Perpetual Licensing + SUMS Pricing |                                 |
|------------------------------------|---------------------------------|
| Virtual Applications               | \$20 per CCU perpetual license  |
|                                    | \$5 SUMS                        |
| Virtual PC                         | \$100 per CCU perpetual license |
|                                    | \$25 SUMS                       |
| Virtual Workstation                | \$450 per CCU perpetual license |
|                                    | \$100 SUMS                      |

# 1.3 DECIDING THE RIGHT LICENSE BASED ON CAPABILITY AND ENTITLEMENT

The following flowchart provides a simple decision tree to help decide which license is required based on the desired entitlement and capability. If you have further questions or are unable to decide based on the decision tree, please contact NVIDIA GRID Support at <http://www.nvidia.com/gridsupport>.

The below table summarizes some common use cases of different solutions. This is not an all-inclusive list of possible solutions. If you have questions, please contact NVIDIA GRID Support.

| I am using...               | I need this license...  |
|-----------------------------|---|
| Citrix<br>XenDesktop        | Virtual PC - for PC level applications<br>Virtual Workstation - for workstation/professional 3D use cases |
| VMware<br>Horizon<br>(View) | Virtual PC - for PC level applications<br>Virtual Workstation - for workstation/professional 3D use cases |
| Citrix<br>XenApp            | Virtual Applications  |
| VMware<br>Horizon<br>RDSH   | Virtual Applications  |
| Other RDSH                  | Virtual Applications  |
| Microsoft<br>RemoteFX       | Virtual PC - for PC level applications  |
| VMware<br>Horizon vSGA      | Virtual PC - for PC level applications  |

## 1.4 NVIDIA LICENSE MANAGER

The NVIDIA License Manager provides monitoring and reporting on license usage for capacity planning and is included with the GRID software packages. This License Manager can be installed on either a physical server or, more likely, a dedicated virtual machine.

To improve end user experience, the GRID software will run with or without a valid license server connection. This is done to ensure that user experience is not impacted by license overages or connection issues. The license server will allow the IT administrator to track license usage and determine correct sizing for their environments. In compliance with the EULA, IT administrators may also use any other method that reliably tracks the software usage to ensure they have enough licenses for their CCU usage.

## Notice

The information provided in this specification is believed to be accurate and reliable as of the date provided. However, NVIDIA Corporation (“NVIDIA”) does not give any representations or warranties, expressed or implied, as to the accuracy or completeness of such information. NVIDIA shall have no liability for the consequences or use of such information or for any infringement of patents or other rights of third parties that may result from its use. This publication supersedes and replaces all other specifications for the product that may have been previously supplied.

NVIDIA reserves the right to make corrections, modifications, enhancements, improvements, and other changes to this specification, at any time and/or to discontinue any product or service without notice. Customer should obtain the latest relevant specification before placing orders and should verify that such information is current and complete.

NVIDIA products are sold subject to the NVIDIA standard terms and conditions of sale supplied at the time of order acknowledgement, unless otherwise agreed in an individual sales agreement signed by authorized representatives of NVIDIA and customer. NVIDIA hereby expressly objects to applying any customer general terms and conditions with regard to the purchase of the NVIDIA product referenced in this specification.

NVIDIA products are not designed, authorized or warranted to be suitable for use in medical, military, aircraft, space or life support equipment, nor in applications where failure or malfunction of the NVIDIA product can reasonably be expected to result in personal injury, death or property or environmental damage. NVIDIA accepts no liability for inclusion and/or use of NVIDIA products in such equipment or applications and therefore such inclusion and/or use is at customer’s own risk.

NVIDIA makes no representation or warranty that products based on these specifications will be suitable for any specified use without further testing or modification. Testing of all parameters of each product is not necessarily performed by NVIDIA. It is customer’s sole responsibility to ensure the product is suitable and fit for the application planned by customer and to do the necessary testing for the application in order to avoid a default of the application or the product. Weaknesses in customer’s product designs may affect the quality and reliability of the NVIDIA product and may result in additional or different conditions and/or requirements beyond those contained in this specification. NVIDIA does not accept any liability related to any default, damage, costs or problem which may be based on or attributable to: (i) the use of the NVIDIA product in any manner that is contrary to this specification, or (ii) customer product designs.

No license, either expressed or implied, is granted under any NVIDIA patent right, copyright, or other NVIDIA intellectual property right under this specification. Information published by NVIDIA regarding third-party products or services does not constitute a license from NVIDIA to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property rights of the third party, or a license from NVIDIA under the patents or other intellectual property rights of NVIDIA. Reproduction of information in this specification is permissible only if reproduction is approved by NVIDIA in writing, is reproduced without alteration, and is accompanied by all associated conditions, limitations, and notices.

ALL NVIDIA DESIGN SPECIFICATIONS, REFERENCE BOARDS, FILES, DRAWINGS, DIAGNOSTICS, LISTS, AND OTHER DOCUMENTS (TOGETHER AND SEPARATELY, “MATERIALS”) ARE BEING PROVIDED “AS IS.” NVIDIA MAKES NO WARRANTIES, EXPRESSED, IMPLIED, STATUTORY, OR OTHERWISE WITH RESPECT TO THE MATERIALS, AND EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES OF NONINFRINGEMENT, MERCHANTABILITY, AND FITNESS FOR A PARTICULAR PURPOSE. Notwithstanding any damages that customer might incur for any reason whatsoever, NVIDIA’s aggregate and cumulative liability towards customer for the products described herein shall be limited in accordance with the NVIDIA terms and conditions of sale for the product.
