GET THE MOST OUT OF AUTODESK 3DS MAX WITH NVIDIA

See your designs as quickly as you envision them.

The **NVIDIA® Iray®** renderer used in Autodesk® 3ds Max® software helps give designers an intuitive way to create images that rival photographs—in a fraction of the time of traditional workflows. Now, you can use materials and lights that correspond and react like those in the physical world to quickly bring your visions to life, rather than juggling a variety of computer graphics controls to merely approximate it.

Immediately experience edits as you adjust and perfect your camera, lighting, materials, and geometry with the ActiveShade interactive rendering window in 3ds Max. The Iray renderer takes full advantage of your graphics cards and delivers scalable performance, so the more GPUs you have, the faster your renders will be.

Fueled by NVIDIA's most powerful GPU architecture ever, this solution lets you render more than 18x faster using NVIDIA Multi-GPU Technology while still working with all your other software applications. Now Iray Server distributed rendering software is available from NVIDIA to harness the power of networked workstations for even faster rendering. This helps reduce, or even in some cases eliminate, creation of expensive and time-consuming physical prototypes and photo shoots.

With adoption of 4K displays growing and the emerging use of Virtual Reality for design workflows, the increased graphics performance required by these new technologies is leading designers to demand the power and reliability of NVIDIA Quadro GPUs.

Quickly create stunning photorealistic renderings using 3ds Max and NVIDIA GPUs.

With NVIDIA Iray in 3ds Max designers can interactively see photorealistic representations of their designs.

Empower More Users with NVIDIA GRID™

With the industry's most advanced technology for sharing GPU hardware, NVIDIA GRID™ technology enables multiple users to access the power of a single GPU without compromising their graphics experience. GRID gives 3ds Max users the graphics horsepower they need across devices and locations. Designers and engineers can confidently work with Autodesk Product Design Collection apps delivered by native NVIDIA graphics drivers while collaborating in real-time for better productivity.

With NVIDIA GRID, Autodesk 3ds Max users can enjoy the same highly responsive experience they get at their desk—from any device, anywhere, anytime. To find out more, www.nvidia.com/grid

RECOMMENDED GRAPHICS SOLUTIONS FOR AUTODESK 3DS MAX*

| USAGE | Occasional NVIDIA Iray rendering | Very large assembly, NVIDIA Iray rendering | Multiple GPUs for frequent NVIDIA Iray rendering or simultaneous rendering and CAD design |
|---------------------------------------|--|--|---|
| For Desktop Workstations | Quadro P4000 | Quadro P5000 | Multi-GPU (3x Quadro P5000) |
| GPU MEMORY | 8 GB GDDR5 | 16 GB GDDR5X | 3x 16 GB GDDR5X |
| REPLACES | Quadro M5000 | Quadro M6000 24GB | Quadro K6000 or Quadro 6000 |
| For Mobile Workstations | Quadro P2000/P3200 | Quadro P4200 | Quadro P5200 |
| GPU MEMORY | 4 GB GDDR5 / 6 GB GDDR5 | 8 GB GDDR5 | 16 GB GDDR5 |
| REPLACES | Quadro M3000M | Quadro M4000M | Quadro M5000M |
| For remote rendering workflows | NVIDIA Quadro Visual Computing Appliance (VCA) | | |
| SPECIFICATIONS | 8 NVIDIA high-end GPUs with 12 GB memory per GPU (24,576 CUDA cores) | | |
